📍 São Paulo, SP - Brazil

I've been working with web development since 2012, when I started developing WordPress websites at a communication agency. It took me approximately 8 years to delve into this technology, until in 2020 I decided to migrate and specialize in React.js. I follow principles and practices such as Clean Code and SOLID and my specialty is problem solving.

ENGLISH: Intermediate

Experience

Health Protection
Front-end Developer   09/2020 - 10/2022

Project developed in Next.js with TypeScript. Among the main tools used in the project are Context API, Axios, Tailwind CSS, Chakra UI, ESLint and React Query. For content management we used Prismic CMS. My activities involved front-end development, integration with APIs, creation of components and pages, maintenance and bug fixing and continuous deployment with Netlify and Vercel.

Toxicologia Pardini
Full-stack Developer   08/2018 - present

Toxicological examination company where I work as a full-stack developer, responsible for developing and maintaining the company's website, in addition to developing integrations with internal systems, CRM and ERP. Among the main activities are SEO optimization, development of new features, bug fixing and website maintenance.

360 Comunicação Digital
WordPress Developer   05/2013 - 08/2018

Communication agency where I developed several projects in WordPress, participating in the entire development process, from the creation of the layout to the publication of the website. My activities involved creating and customizing WordPress themes and plugins, optimizing performance and SEO, creating landing pages and integrating with APIs.
